**From Brand: Rizzoli : Watches International 2002** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Watches International 2002:

Lauria If you are a serious collector then put your money towards another watch. This book shows no/little pricing. In many cases it is a paid advertisement of the watch companies - products and technical descriptions are not shown/listed. You can get more info from a company's website/product catalog. Very disappointing book. It is a slick high glossy collection of photos - you get neither a good coffee table book nor a technical reference. I gave it to the dog to play with - at least someone is enjoying it.

Since 1991, this annual publication has been setting the standard for up-to-date reference guides devoted to watches. At over 500 pages (the biggest volume yet), Watches International 2002 showcases all the latest watches from around

the world, from every major designer. Several hundred beautiful and meticulous full-color photographs present the watches' design and artistry. The photographs not only show the watches' style and exquisiteness, but also-and perhaps most important-the watches' details. The text gives an overview of each of the new watch's particular innovations, as well as the older watches' histories. Technical descriptions with retail prices make this a must-have reference for everyone who loves timepieces personally or needs to know about them professionally. This is the most comprehensive and current guide one can buy.
