I've had different versions of the "watch bibles" for the last 10+ years, and from now on I'll have to look at them in person before buying. These books used to be great references for the products of all the major watch manufacturers. Now it's just a glossy overview of what's new in watches. If you are into the boutique and jewelry watch brands like Cartier, Dior, and the like, this is a great book. Most of the content is dedicated to these watches, and the pictures are great. If you want a reference for Patek, Rolex, JLC, etc. Stay away. Get the manufacturers catalogs instead. 5 of 5 people found the following review helpful. not impressed. By Customer This publication has the "potential" for being great. However, everything seems a little incomplete. Many watches lack prices. Many of the brands are missing models of great importance. Several big companies are missing. The good thing is the brief description offered of each brand including facts and history. 0 of 0 people found the following review helpful. book. I've never seen one better.

Now in its ninth edition, *Watches International* has been setting the standard for up-to-date reference guides devoted to luxury timepieces since 2000. At more than 700 pages, *Watches International, Volume IX* showcases the latest watches from around the world, from every major watchmaker. Hundreds of beautiful full-color photographs show not only the watches' style and exquisiteness, but also the details of their movements, functions, cases, and dials. The text gives an overview of each of the companies' histories.
