Five StarsBy StarykonGreat book for starters and for some more experienced blade smiths as well.1 of 1 people found the following review helpful. Recommended by my Blacksmith instructorBy eldergod0515I'm beginning to learn blacksmithing (three classes). My instructor has been practicing for almost three decades and highly recommended this book. He had the original, this is the updated/revised. I'm finding it very useful. My instructor was so impressed when I showed him that he ordered the revised edition. I think the revised version has about six more pages but the photos are in color (original was either BW or mostly BW).

Don't spend big bucks on your knife shop! You don't need to spend a fortune to start making fantastic knives. Noted knifemaker Wayne Goddard provides outstanding step-by-step instructions for making your own tools, finding the right steel and forging, grinding and heat-treating knives on a budget. Wonderfully illustrated with full-color photography, Goddard's book guides you through the knifemaking process from start to finish and even includes a budget breakdown showing everything you need is available to bargain prices. Goddard even explains and demonstrates the making of wire Damascus blades with the simplest of tools. Wayne Goddard's \$50 Knife Shop is a find companion volume to Goddard's book The Wonder of Knifemaking and provides all the details you need to start making knives on a budget.
