X.G. Andrew : Weathered Hut: Secrets of the Hmong before purchasing it in order to gage whether or not it would be worth my time, and all praised Weathered Hut: Secrets of the Hmong:

This historical fiction novel depicts a great story about relationships between strangers who became lifelong friends

and family during the turmoil of the Vietnam War. Ger, barely a teen, after a brief English language training became a soldier for the CIA's secret front across the Laotian border in an effort to rescue downed pilots in enemy territory and later suppress the supply trail of the North Vietnamese to their soldiers in the south. The complex issues and relationships of the story provided a clearer understanding of the roles of the Secret Guerilla Unit (predominantly Hmong and Laotian nationals) helped the United States unknowingly to their people back home. The affects of the war on the Hmong were illustrated in a narrative voice that readers can easily identify with.

About the AuthorAfter graduating from high school in Green Bay, WI., Andrew Xiong attended UW-Whitewater majoring in English. Andrew Xiong completed his masters of science in teaching degree in 1992 from UW-Stevens Point and relocated to St. Paul, MN to teach and eventually become a school administrator. While Andrew focused on being an advocate for quality education for all students in public urban schools, he wrote poetry and novels on the side as a hobby. Creative writing has always been an interest of his along with his passion for teaching and learning.
