Peter Braun : Wristwatch Annual 2003: The Catalog of Producers, Models, and Specifications before purchasing it in order to gauge whether or not it would be worth my time, and all praised Wristwatch Annual 2003: The Catalog of Producers, Models, and Specifications:

This book includes all the "major" players in the watch industry - but unfortunately, it does not include some of the smaller "houses" (i.e. manufacturers). I was surprised to read that it included some non-European makers like some from the USA. One thing

I noticed is that the book has several errors, just try matching some of the photos with the descriptions provided and you'll see what I mean! For the publishers and editors: get some quality control, pleeeaaasse! I recommend it for the beginner and the advance watch collectors. And yes, I do agree with another reviewer, there's no such thing as too many watches! :-)

Every year hundreds of new wristwatches are introduced. Some feature innovative designs or mechanical improvements, and others are available only in limited editions, keeping the field interesting for collectors. Following the success of the previous edition, this new annual highlights hundreds of the year's most extraordinary wristwatches in close-up color photographs accompanied by complete specifications, giving collectors a wealth of up-to-date information, all in one volume. The specifications for each watch include price, movement, special features, complications, casings, dial, band, and available variations of a particular model. In addition, general histories of each manufacturer provide an overview of the company's background and style. The annual's elegant photography and organization will encourage readers to peruse the year's offerings watch by watch. And the range of styles, from classic to modern, will appeal to watch enthusiasts the world over, who will find this current edition both a handy reference and required reading.
